

Vision Meeting

“Camelford should become the heart of a network of footpath and cycleways to connect the town to its beautiful surroundings and to connect the outlying population to the town.”

‘The IT revolution has made it possible for many office workers to work wherever they like. However, there is a shortage of office space at present.’

‘In order for Camelford to thrive as a community, it follows that employment must increase. This means encouraging local businesses to establish or expand, as well as providing an environment in which new businesses are attracted. Businesses from elsewhere need encouragement to relocate here.’

‘A centre of excellence for outdoor pursuits eg walking, cycling, star gazing with supporting infrastructure, shops & accommodation’

‘Charming moor-side town with a welcoming community, individual shopping choices and well-maintained facilities.’

‘Promote Leisure/Recreation/Countryside Activity

Leisure/Recreation & Tourism related infrastructure’

‘We need to establish a strong employment base’

The vision from a previous community plan was also considered:-

Camelot Country Vision 2004

‘The area will be a robust community enjoying sustainable economic prosperity – self-reliant and self-sustaining, and exporting ideas around the world.

It will be a high knowledge area, enjoying in particular a reputation as a centre of excellence for environmental management and rural community development, both through innovative local practice and through new ideas, techniques and technology pioneered and developed locally.”
