|--|--|
| 1) Bring back Fun week! We have all witnessed how much the town gets together for rare events such as WW1 vigil. We need more community events. Fun week gave many of us memories including duck race. | 12) New medical centre to include dental surgery and pharmacy able to carry out minor procedures. Update sewage system. Build distributor road. Housing to encompass ALL age groups not just young people. |
| 2) Don't know what NP is. Need a bypass, town more attractive to visitors, need a supermarket. Houses being built locals can't afford and services (like Drs) not improved to cope | 13) No dentist. What happened to the supermarket and new medical centre? |
| 3) Educational opportunities/facilities for post 16. | 14) Such wonderful history and old buildings. Traffic is a major concern increasing yearly and the large vehicle traffic makes it unpleasant and unsafe to visit the town centre. |
| 4) I believe support should be given to maintain the library service in Camelford - providing access to computers and a lifeline to many elderly people and young families. | 15) There are too many houses being built and not enough other facilities to provide for all the people living here! The school isn't big enough and there is nothing for parents with young children to do. |
| 5) I'd like to build a bungalow for Mother and me on our field as no suitable accom in Helstone. How can we try to include our land on the new building boundary as it was excluded last time. | 16) Too many houses are being built without sufficient infrastructure to sustain it. Town has gone downhill so much in the last 10 years, no longer a nice place to live. |
| 6) It's a no to being involved as my wife is already involved and it would be wrong for both of us to have a say | 17) 200 characters wasn't enough so I will just say what people are thinking. Stupid idea from people who don't care about people that already live in Camelford |
| 7) Keeping free parking is essential to keeping our town alive. Traffic flow could be improved by making the priority (give way) sign more obvious as you come into town past the old police station... | 18) We desperately need a supermarket in this town. We need to stop accepting trouble families from up country. We used to have a lovely town and now it's a disgrace due to people that have moved into the area. |
| 8) Make Camelford Drs surgery bigger! And there is a lot of room for improvement to the so called new school | 19) We have enough housing here - what we need now is larger medical facilities i.e. doctor's surgery |
| 9) More support should be available for alcohol and drugs abuse. We can't ignore that there's an issue in Camelford even though the Council may feel the issue would be highlighted by creating a support centre | 20) What about more facilities for our children? More opening hours for the library. |
| 10) My selection of other is specifically to draw attention to the need to attract tourist/tourism interest in all its forms to develop further the economic and social wellbeing of the community. | 21) When on the Town Council in the 90s we said that too many houses were being built and it would turn it into a dormitory town unless more commercial sites were made - proved right. NO MORE HOUSES!!!! |
| 11) Areas of concern - bypass, supermarket, health centre, free car parking, post 16 education, public transport, leisure centre. Happy to elaborate if required; I am a previous resident | 22) With all the new housing, can the sewage, water, schools and doctors cope? I would like to shop more locally however the choice of food is limited. |
